Pipeline Launching & Receiving Traps

**Design &
Manufacture**
on an international scale

www.glapwell.co.uk

Specialist Pipeline equipment

Established in 1974 and widely acknowledged as a highly qualified manufacturer of specialised pipeline equipment.

Glapwell is fully equipped to design and manufacture purpose built onshore and offshore pipeline launching and receiving traps and associated equipment to various industries worldwide.

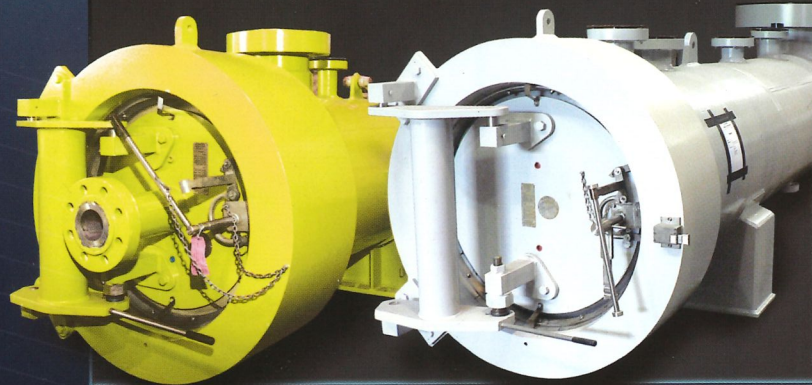

Designs are completed using the latest 3D CAD software ensuring that all client specific specifications are fulfilled as well as all major National and International design standards.

Besides our large team of highly skilled engineers, who can work in a wide range of materials, resources include onsite technical and product support helpline to our technical and design teams.

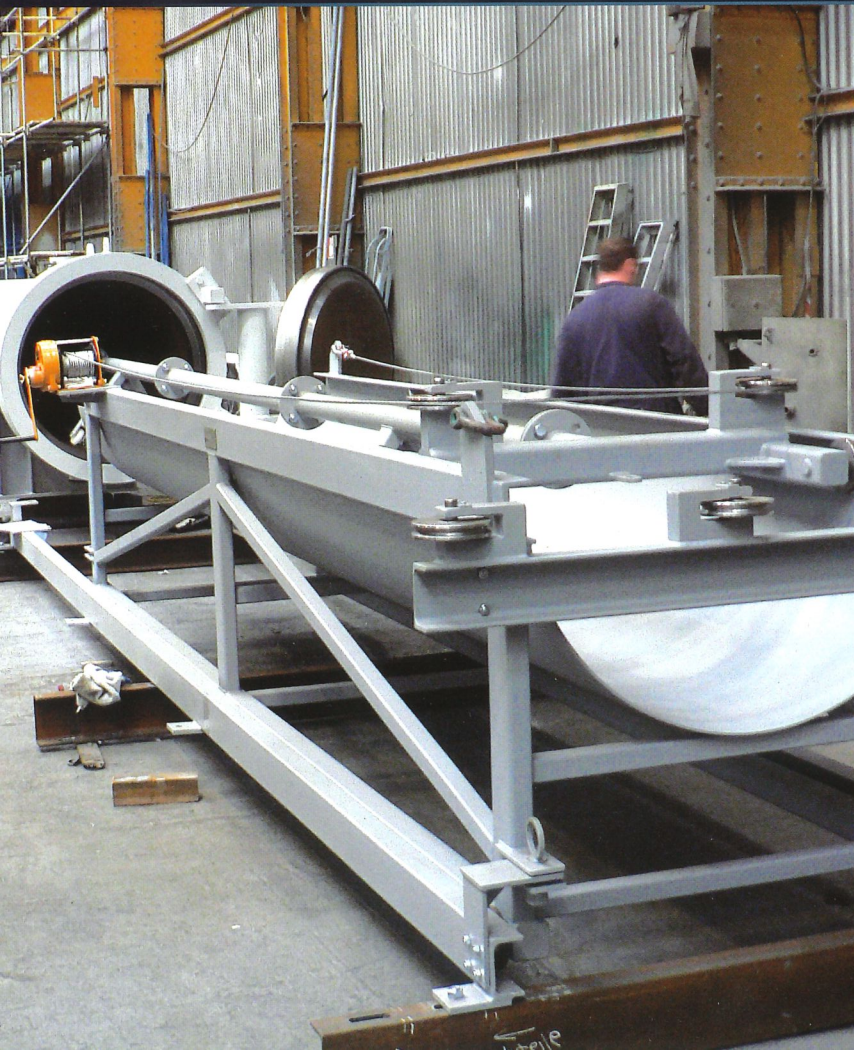

Material Ranges

For both Sour and Non-sour Services

- ▶ Carbon Manganese Steel, tested to suit different environments
- ▶ Austenitic Stainless Steel
- ▶ Chrome Moly Steels
- ▶ Duplex Stainless
- ▶ HIC Tested Materials including SSC & SOHIC if required
- ▶ Weld overlayed
- ▶ Nickel Alloys

Manufactured to Client Specification

- ▶ Horizontal Pig Launchers & Receivers
- ▶ Inclined Pig Launchers
- ▶ Declined Pig Receivers
- ▶ Vertical Pig Traps
- ▶ Skid Mounted Pig Traps
- ▶ Multi-Launchers
- ▶ Handling Facility
- ▶ Jib Cranes
- ▶ Split Tees
- ▶ Barred Tees
- ▶ Pipped Bends
- ▶ Pig Signallers
- ▶ Interlock Control
- ▶ Sphere Pins (Mechanical & Actuated)
- ▶ Intrusive & Non-Intrusive Pig Signallers
- ▶ Pig Trap Extensions
- ▶ Bespoke Fabricated & Welded Pipeline Products
- ▶ Refurbishment & Modification of Existing Pig Traps

Worldwide Coverage

Providing services to a global customer base with a renowned reputation for project fulfillment

Glapwell Contracting Services have completed numerous pipeline projects worldwide, and are well renowned for the professionalism, quality of work and after sales service.

Glapwell delivers in full and on time

Our company is totally independent and offers a wide range of pipeline launchers, receivers and associated equipment. Our expertise in the design, fabrication and welding ensures our products are produced to the highest quality standards and meet the strictest industry designs, supply and fabrication requirements.

International Quality Standards Award

We work to all International Quality Standards as well as adhering to International Health and Safety Standards, and have total commitment to quality and safety at all times throughout the manufacturing process.

Our high regard for optimum quality has resulted in the following certification being awarded:

BS EN ISO 9001 Quality Management System
Authorised ASME VIII Div. 1 (U) Code stamp holders
PED

Production and Testing Facilities

Our total capability as a solution provider is supported by fully qualified, coded staff. We have in-house Design, Manufacture and Testing capabilities to produce Pipeline Launchers and Receivers from 6"nb to 54"nb and from 20 Bar up to 420 Bar Pressure in a wide range of materials for both Onshore and Offshore applications, including Subsea and Skid-Mounted units with associated pipework, valves, instrumentation and control panels etc.

GLAPWELL
CONTRACTING SERVICES

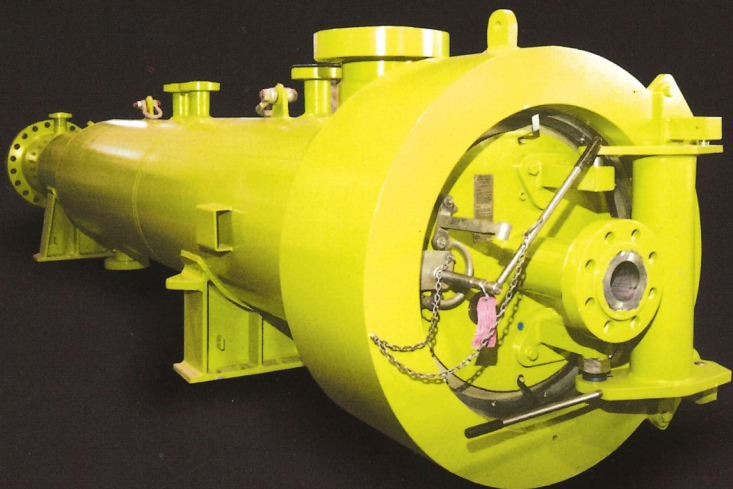

Pipeline Launching & Receiving Traps

YOUR GLOBAL PARTNER
IN THE MANUFACTURE OF

Pig Traps - Pressure Vessels - Special Projects

International Product Distribution

Our ability to offer a quality worldwide service is backed up our network of agents based in key locations around the globe.
